1. CEO Letter

Dear Stakeholders, I am pleased to present our 2023 ESG Report. At ACME Corporation, we recognize that sustainable business practices are not just a moral imperative but a driver of long-term value. Over the past year, we have made significant strides in reducing our carbon footprint, fostering an inclusive workplace, and enhancing our governance structures. This report details our progress, our challenges, and our commitments for the future. Sincerely, The CEO.

2. About this Report

This report has been prepared in accordance with the Global Reporting Initiative (GRI) Standards: Core option. The data covers the fiscal year ending December 31, 2023, unless otherwise stated. We have also referenced the Sustainability Accounting Standards Board (SASB) standards for our industry. Materiality assessment was conducted in Q2 2023, engaging with over 500 internal and external stakeholders to identify the most impactful ESG topics.

3.1 Climate Change & Emissions

Our commitment to the Paris Agreement goals remains steadfast. In 2023, we achieved a 15% reduction in Scope 1 and Scope 2 greenhouse gas emissions compared to our 2020 baseline. This was primarily driven by our transition to renewable energy sources across our manufacturing facilities. We are currently evaluating our Scope 3 value chain emissions and expect to set Science-Based Targets (SBTs) by 2025.

Emissions Data Table

Year	Scope 1 (tCO2e)	Scope 2 (tCO2e)	Total
2020	120,000	85,000	205,000
2021	115,000	80,000	195,000
2022	108,000	72,000	180,000
2023	98,000	65,000	163,000

3.2 Energy Management

Energy efficiency is a key pillar of our environmental strategy. We have invested \$4.2 million in upgrading HVAC systems and installing LED lighting across our global offices. Furthermore, 45% of our total energy consumption now derives from renewable sources, primarily through Power Purchase Agreements (PPAs) in North America and Europe.

3.3 Water & Waste

Water stewardship is critical in our manufacturing processes. We implemented a closed-loop water system in our Texas facility, saving 12 million gallons of water annually. Regarding waste, we achieved a 78% diversion rate from landfill through increased recycling and composting initiatives. Our goal is zero-waste-to-landfill by 2030.

4.1 Diversity, Equity & Inclusion

We believe a diverse workforce drives innovation. In 2023, women represented 42% of our global workforce and 35% of leadership roles. We have also increased representation of underrepresented minorities in our US offices by 8% year-over-year. Our DEI council actively reviews hiring practices and promotes an inclusive culture through mandatory bias training.

4.2 Employee Health & Safety

The safety of our employees is our highest priority. Our Total Recordable Incident Rate (TRIR) decreased to 0.42 in 2023, down from 0.55 in 2022. All facilities undergo rigorous third-party safety audits, and we conduct monthly safety drills. Mental health initiatives were expanded, including a 24/7 employee assistance program.

Safety Metrics

Region	TRIR	Lost Time Incidents
North America	0.38	4
Europe	0.41	3
Asia Pacific	0.55	6

5.1 Board Composition

Our Board of Directors oversees ESG strategy through the Nominating and Governance Committee. The board comprises 12 members, 33% of whom are independent directors. We maintain a diverse board with a mix of skills in finance, technology, and sustainability. In 2023, we appointed a new director with extensive climate risk expertise.

5.2 Ethics & Compliance

Ethical conduct is embedded in our corporate DNA. We updated our Code of Conduct in 2023, emphasizing anti-corruption and data privacy. 100% of employees completed annual ethics training. Our anonymous whistleblower hotline received 24 reports in 2023, all of which were investigated and resolved within our 60-day target.

6. ESG Data Appendix - Continued

The following tables represent granular, facility-level data for the 2023 reporting period. This data has been verified by an independent third-party auditor. Variations in data are due to changes in operational capacity and acquisitions made in late 2022. We are committed to providing transparent and comparable data to our stakeholders.
